

# Jonny Lang, Save Yourself

You got a secret under the table  
Nobody knows it but you  
Never a problem here on the outside  
You're good at disguising the truth

After you wake up out of the nightmare  
How do you cast out the fear inside

[chorus]  
All alone there you stand  
Reaching out for someone's hand  
Come with me if you wanna save yourself

Where is the good life you always dreamed of  
Where is the faith you once had  
Sooner or later hope will be useless  
Pushing you back where you began

All alone there you stand  
Won't you let me take your hand  
Come with me if you wanna save yourself  
Don't let the past haunt your mind  
You should leave it all behind  
Come with me if you wanna save yourself

There's something in the way  
It's gotten into you  
You've learned to love the chains  
Through the needle's eye can you escape

All alone there you stand  
Won't you let me take your hand  
Come with me if you wanna save yourself  
Trust your heart not your mind  
Cause you're running out of time  
Come with me if you wanna save yourself
