

Jovani, Running Heart (feat. NOTSOBAD & Chris

We only stay until the fire burns down
And the heat only stays until the lights go out, out
Bitter sweet when you go
I don't hear the alarm
Memories in my head just ain't enough, ain't enough

So won't you take this running heart and show me how to love, show me how to love
A story is written in the stars so show me how to love, show me how to love
Like we are not scared to love, love

We scared to love, love
We scared to love, love
We scared to love, love
Like we are not scared to love

We came to farest town to say goodbye
Falling free only you and I can save tonight
Bitter sweet when you go
I don't hear the alarm
Memories in my head just ain't enough, ain't enough

So won't you take this running heart and show me how to love, show me how to love
A story is written in the stars so show me how to love, show me how to love
Like we are not scared to love, love

We scared to love, love
We scared to love, love
We scared to love, love
Like we are not scared to love
We are not scared to love
