

Joy Electric, Joy Electric Land

Joy electric land
Singing in your heart again

I'm a boy and you're a girl
So let's join hands for all the world
And share the secret
Young and old
The blessed hope that we hold in our hands

Joy electric land
Singing in your heart again

Come with us, come join the fun
Sing to the tune of God is love
And with this hope we hold the key
To share with all of those who would believe
