

Joy Electric, Synthesized I Want You Synthesized

1,2,3

And the the glowbugs fly free
Navigate the craft "Electro Joe"
The imaginary four point pendulum
Threads the super strings of life support
You build the links to my heart

Synthesized I want you synthesized
To create a new life

You're the multiplier of equations
You design the math of pinpoint parts
Time and age are tools of your experiments
You effect the course of electrons
You build the links to my heart
