

# Joy Electric, Synthesized I Want You Synthesized

1,2,3

And the the glowbugs fly free  
Navigate the craft &quot;Electro Joe&quot;  
The imaginary four point pendulum  
Threads the super strings of life support  
You build the links to my heart

Synthesized I want you synthesized  
To create a new life

You're the multiplier of equations  
You design the math of pinpoint parts  
Time and age are tools of your experiments  
You effect the course of electrons  
You build the links to my heart
