

Jucifer, Dissolver

I'll suck the shine right out of your eyes
feed you lines and make you dry
you're so ugly and i'm so wise
I'll fit you existence with
weakness and lies

get out of my
get out of my
get out of my
get out of my head

I'll touch you up to fill my need
my skin is hot the bones just bleed
I'm high as new amsterdam
lit up and white
slit up your envy and bathe you in light

get out of my
get out of my
get out of my
get out of my head

(soothes me when I'm down
soothes me when I'm up again
soothes me when I'm down)

measure time in chemicals
where's the one I want
measure time in chemicals
feeling slow and gaunt
taste the smoke, forget to breathe
close my eyes and leave
wake alone, inject again
feeling warm and clean
who will love me now... so old and long
who will love me now
so old and long... so old and long
so old and long
