

# Julian Austin, Should Be Over You

I know it will kill me,  
When the time comes that we say goodbye  
I hope I'll be strong when I look ni your eyes  
Girl I've never felt so much just to let it go  
But before our one last kiss  
I just want you to know

That after I never stop wanting to die  
After I never feel nothing for the rest of my life  
After the hell I know that I'll go through  
After the heartache and tears and lonely and hurtin'  
One night stands and the drinking ain't workin'  
And missing you has near killed me a time or two  
Then after that I should be over you

And to think that I knew better not to mess with my heart  
And why I never stopped this right there from the start  
But now I'm here between lost and nowhere  
Drifting over the edge  
I'm past the point of gone too far like a bad dream with no end

That after I never stop wanting to die  
After I never feel nothing for the rest of my life  
After the hell I know that I'll go through  
After the heartache and tears and lonely and hurtin'  
One night stands and the drinking ain't workin'  
And missing you has near killed me a time or two  
Then after that I should be over you  
I should be over you  
How I'm gonna get over you oh girl  
So tell me how will I get over you
