

Julianne Hough, Dreaming Under The Same Moon

(feat. Derek Hough)

Take a chance, a leap of faith
Leave the nest
I guess that's how we've learned to fly
We spread our wings and rode the wind
You've chased your rainbows
I've chased mine

It's not always easy being this far apart
But don't you get the feeling
We're connected at the heart

And we're dreaming under the same moon
Under the same stars
I close my eyes, wishin'
I'm gonna see you soon
When I see that night sky glowin'
There's a peace I get from knowin'
That we're dreaming under the same moon
Under the same stars tonight

Here I am, and there you are
I admit there are times I wish I was home
Then I hear your voice on the line
Makes me realize I'm never alone
We've been working so hard
Try to make it all come true
But what I want for me, well, that's what I want for you

Oh, baby, we're dreaming under the same moon tonight
Tonight
Take a chance, a leap of faith
Leave the nest, I guess that's how
Now we're dreaming under the same moon

Here I am and there you are, I admit there are times
Now we're dreaming under the same moon
