

# Julie Roberts, All I Want Is You

a

What I need is medication  
In the form of a vacation  
What I need is skies of blue

What I need is a perspective  
One that's healthy but objective  
What I need is a point of view  
What I want is you

Everyone says, move on  
That is what you would want  
Good advise, they are right  
That's what I need to do  
But what I want, all I want is you

What I need is bread and water  
And a father for our daughter  
What I need is someone new  
What I want is you

Everyone says, move on  
That is what you would want  
Good advise, they are right  
That's what I need to do  
But what I want, all I want is you  
(Only you)

(Instrumental Interlude)

What I need is loss of memory  
To forget when you were with me  
What I need is to admit we're through

What I want, what I need  
Oh, what I want is you (only you)  
What I want is you

(Only you)

All I want  
Is you
