## Junior Varsity, When We Meet Aliens

I see no ground or sky I "don't not" see people And sometimes I do

I have no time to waste Searching for answers To questions that have none We'll all die, I can live with that.

You say you found a way to sit inside my skin I say "don't worry" cause it's coming around again I finally found a way to fit inside my skin I begged "don't worry" cause I always come through in the end

Dont keep a collection Piling up up Counting all of your karma

But you are still Searching for answers To questions that have none We'll all die, I can live with that.

You say you found a way to sit inside my skin I say "don't worry" cause it's coming around again I finally found a way to fit inside my skin I begged "don't worry" cause I always come through in the end
