

# Just Surrender, Medicate Myself

I'm a slave to my job  
And it's driving me crazy  
The man is breathing down my neck  
I go to sleep  
So I can wake up really early  
You can take the money back

And don't you believe I'll take my pay  
Down to the corner store  
And education's what I needed  
I need to drink a whole lot more

I need a way to get away  
It's the life that we lead  
Another day, another dollar  
What's there left to believe  
Born and raised  
Just to live inside this cell  
I'll medicate myself

As I cruise the city streets  
Busy with shuffled feet  
No one  
With their eyes looking up at the sky  
They found their place in line  
I don't want to be a ghostly shell  
Of who I am  
I could never leave my dreams  
For someone else's plan

I need a way to get away  
It's the life that we lead  
Another day, another dollar  
What's there left to believe  
Born and raised  
Just to live inside this cell  
I'll medicate myself

I need a way to get away  
It's the life that we lead  
You're here today, you're gone tomorrow  
What's there left to believe  
Fold the covers  
And I crawl inside my shell  
I'll medicate myself

I need a way to get away  
It's the life that we lead  
Another day, another dollar  
What's there left to believe  
Born and raised  
Just to live inside this cell  
I'll medicate myself

I need a way to get away  
It's the life that we lead  
You're here today, you're gone tomorrow  
What's there left to believe  
Fold the covers  
And I crawl inside my shell  
I'll medicate myself
