

# Justin Timberlake, SoulMate

[Intro]

Summer starts now

[Verse 1]

I love your heartbeat givin' me rhythm  
And I can feel your frequency, so unique  
In other words, such a freak, set me free

[Pre-Chorus]

I wanna be, wanna be  
I wanna be, I wanna be your—

[Chorus]

Soulmate, for the night  
Let me put my soul on you, it's only right  
Let me pull you up out your body, into mine  
Let me be your soulmate for the night

[Post-Chorus]

Just for the night, for the night  
Just for the night, for the night  
Just for the night

[Verse 2]

Two rhythms turn into one heartbeat, yeah  
Magic when you get close to me  
And we can disappear  
Make it disappear, that's too many clothes for me

[Pre-Chorus]

I wanna be  
I wanna be, I wanna be your—

[Chorus]

Soulmate, for the night  
Let me put my soul on you, it's only right  
Let me pull you up out your body, into mine  
Let me be your soulmate for the night

[Post-Chorus]

Just for the night, for the night  
Just for the night, for the night  
Just for the night, for the night  
Just for the night, for the night  
Just for the night

[Bridge]

Whatever you believe in could be real  
'Cause I believe in miracles  
So please right now, you and me right now  
We could live our dreams right now  
First, lay down

[Chorus]

I'ma be your soulmate (ayy), for the night  
Let me put my soul on you, it's only right  
Let me pull you up out your body, into mine  
Let me be your soulmate for the night  
Just for the night  
Soulmate for the night  
Let me put my soul on you, it's only right  
Let me pull you up out your body, into mine  
Let me be your soulmate for the night

[Post-Chorus]

Just for the night, for the night  
Ooh, whatever you believe in could be real  
Just for the night, for the night  
Just for the night, for the night  
Ooh, whatever you believe in could be real  
Just for the night, for the night  
Just for the night

[Outro]

Ooh, whatever you believe in could be real  
I love your heartbeat, ayy  
I love your—whatever you believe in could be real  
I love your heartbeat  
I love your—
