

# Justincase, Constellation

I set you right back in your place  
And put you right back where you came  
And let you think about your life  
And let you realize what you're like

Oh, it's something that he didn't know

[Chorus:]

Did you ever want to be the only star in the constellation?  
Did you ever want to be the furthest from this situation?  
Yeah, the constellation

In these times of different moods  
They come from all those interludes  
Like the girl you thought you'd need  
And like the man you'd wish you'd be

Oh, it's something that he didn't know

[Chorus]

You better watch, better watch  
What you do  
You better watch, better watch  
What you say  
What you say

[Chorus]
