

K-391, Nightmare

where do we go
when we're stuck in slow motion
lost in the night
trying to find our way home

stories we've told
from the land to the ocean
light up the the road
what's the right way to go?

dream a little dream for me
you can't believe
it's still a nightmare

dream a little dream for me
you can't believe
it's still a nightmare

always in my mind

you know that when the night is cold
we need to stay, together

castles of gold
buried deep underwater
nobody knows
what the future will hold

you take my hand
while we reach for the answer
hard to believe
what's the right way to go

dream a little dream for me
you can't believe
it's still a nightmare
further from reality
we can't believe
it's still a nightmare

always in my mind

you know that when the night is cold
we need to stay, together

you know that when the night is cold
we need to stay together
you know that when the night is cold
we need to stay
you know that when the night is cold
we need to stay together
you know that when the night is cold
we need to stay together
