

K-Maró, Celebration

So here it is served on a platter
It's victory lap it can't get no better
I mean look at your faces now
It's a great feeling like we're trading places now
You know what I'm talking about
That bourgeoisie where I wasn't allowed no
It's just like being lost in the crowd
And have somebody call you to show you around
Hey thank you! You might meet me again
This time I know where I'm going it won't happen again
Never burn myself twice with the same fire
Never got bit twice by the same liar
And I hated average always tried to go faster
Leaving dust and ashes
It's kind of great when we look back
We know where we come from
We know where we're going at
Hey it's a celebration
Kay is in town it's my invitation
Hey lift your glass up high
Let me see you all, here, let me say hi
Hey it's a celebration
It feels like my day of graduation
Hey, lift your glass up high
Let me see you all here let me say hi
Now we're all grown up
We've been through a lot do you remember the block?
Do you remember the days?
The games on the cops, had to go our separate ways
But now we finally made it, some of them are loving it
Some others hate it
But f**k it it's the price of glory
You won't see their faces when I'll tell you my story
I'll have a 100 mil' before I'm 40 you think they'll come say sorry
So it's all about us all about the family
Only in us we trust so show me the money
So let me celebrate life, celebrate lover under celebration lights
Let's have a party tonight' cause after all, I do deserve this! Am I right?
Hey it's a celebration
Kay is in town it's my invitation
Hey lift your glass up high
Let me see you all, here, let me say hi
Hey it's a celebration
It feels like my day of graduation
Hey, lift your glass up high
Let me see you all here let me say hi
And it's great to be back
Take some time to focus and get ready to go back
Get ready to go stronger raise up the bar
Get the challenge a little harder
I'll see you when I'll see you
Never know when it's going to be
Never know where it's going to lead you
Lead you to the best, to the peak of the world
To the middle of the finest, the unspeakable words
There's a lot out there you don't wanna miss
The motherf**kers that you do wanna diss
A lot of bitches that you don't wanna kiss
Step away from distractions scratch them off your list
So if you hustle stand up, no matter what your status is lift your glass up
Yes we celebrate life we celebrate glory we put it to the light
Hey it's a celebration
Kay is in town it's my invitation
Hey lift your glass up high

Let me see you all, here, let me say hi
Hey it's a celebration
It feels like my day of graduation
Hey, lift your glass up high
Let me see you all here let me say hi
