

# K-OS, Black Ice - Hymn For Disco

&lt;Sometimes we take life too serious  
cause we dancin' by the pale light  
I wake up in the morning and I feel delirious  
Cause of somethin' that I did last night  
But then an angel came onto me  
she said "life is more than you see  
You got to be the change that you be  
so don't die. just tryy.."&gt;

[Chorus]

We just some fools with the lights turned on.  
hopin' your comin' too, and turnin' up the moon  
I'll make it through this night sober  
When are you coming back,  
to save this heart of mine  
yeah

(up, up, up, down..)

Time to take it slow,,,,,  
Black ice, white snow  
What is the truth, is we don't really know  
If so, life is a mystery,  
This could be  
the end of all history  
but wait... The Sun rises to the east  
And the world still spins 360 degrees  
On it's axis  
The international practise  
of rhyming proves that there's no beggining or ending  
or timing... and it's been a long haul  
( Rise like the Sun and get your's back once more)  
people party in the light game show  
Once again, we dumb it down to ease of the flow  
What's the the definition of this thing called "Black"?  
I had a premonition 18 ways back (yeah)  
That black's the colour of the universe of whence we came  
I wonder if my souls on ice again

[Chorus]

[interlude]

Fools with the lights turned on... X2

&gt;
