

# K's Choice, Live For Real

Life has always been a pretty song  
And pretty loud  
You're so beautiful  
Why is it fading out

I don't want to live forever  
But as long as I do  
I'd love to live for real

Now the boy who dried your tears  
Is crying all the time  
Now the joy I've had for years  
Has left me for a while

I don't want to live forever  
But as long as I do  
I'd love to live for real

With you I might get there  
With you I might start to feel  
With you I will get there  
With you I will live for real

I will breathe the air, I'll dance  
And you will wonder why  
It's because you made me see  
This chance was moving by

Because I'm not going to live forever  
But as long as I do  
I'd love to live for real

With you I might get there  
With you I might start to feel  
With you I will get there  
With you I will live for real

When a cloud becomes my head  
Play your music loud instead  
And we'll dance until  
The both of us are dead

With you I might get there  
With you I might start to feel  
With you I will get there  
With you I will live for real
