Kaiser Chiefs, Try Your Best

I can't do it any quicker I don't want it any slicker As far as the eye can see Is miles and miles of icy sea.

So try your best And think about it later Or you will never know

I don't feel fear anymore But I can't risk getting mauled As far as the ear can hear The wave is coming loud and clear

So try your best And think about it later Or you will never know So try your best And think about it later Or you will never know Which way your life could go And you'll know when you know

So try your best And think about it later Or you will never know Which way your life could go And you'll know when you know
