

Kalisia, Blurred Exile

[Boarding Platform Hostess]:

"Your attention please. Boarding platform A-51, shuttle for the Colonist I spacecraft only, leave

[Colonists]:

"We are boarding

We are leaving

We'll be travelling

Arken cruisers nearby watching over us

Something's wrong inside"

[Realitionists]:

"This is our only chance to release mankind

Free from this mastery, leave our world behind"

Too late now, the ship has been taken by force

Destination alteration

Hiding away, the League will not find them

No one can stop

Their desperate quest for a brand new virgin land

Too hasty, for they have folded

Space... and the unexpected

[Realitionists]:

"A new dawn has come

System in sight

But nothing else, no other glowing light

Something's wrond outside"

[Colonist I]:

"No entry found in memory, system unregistered

Error in triangulation coordinates

Unable to find any referenced celestial body

Presumable location: out of the known universe"

[Keiji]:

"Sole hospitable place, this satellite

Lands and their oceans, blue and white

I fear this world to be our shrine

For we are now guests of Proserpine"
