

# Katatonina, Distrust

Running my way towards oblivion  
Inside my head electric insomnia  
In your mind i'm fed with distrust  
Heading for anything better than this

I want to be forgotten  
I want you to forgive  
How i'm losing all this  
It's just the way i live

Running my way towards oblivion  
Inside my head smokescreen's gone  
Leaving all this to be undone  
Heading for anything better than this

I want to be forgotten  
I want you to forgive  
How i'm losing all this  
It's just the way i live

Running my way towards oblivion  
Outside my head only the dark  
In your mind i'm the end of it all  
Heading for anything better than this

I want to be forgotten  
I want you to forgive  
How i'm losing all this  
It's just the way i live
