

KATE BOY, Midnight Sun

We keep our head in the blazing light
Let the rays shine through our mind
Memories of never ending days
And the rush we can't escape

Always chasing a forever
Where we will never see the Sun go down
Always dreaming in December
Of the moment that we have right now

So meet me under the midnight sun
Meet me under the midnight sun

We lose our head in the Stockholm sky
Black and blue under heart, pink nights
Feel the freedom, we're wide awake
From the cold, clear, coloured rays

Always chasing a forever
Where we will never see the Sun go down
Always dreaming in December
Of the moment that we have right now

So meet me under the midnight sun
Meet me under the midnight sun

So meet me under the midnight sun
Meet me under the midnight sun
