

Kate Hudson, Live Forever

It was you and me forever
Can you share a little time?
If you can't, I'll give you mine.

The story of my life and lover;
He was everything to me
And then soon, there would be three
And you came and changed my life!

Oh, I was just a little girl
Gone deep into the world,
Thought I could take it on.

And you showed up right by my side,
My witness and my light
Now, we've grown up in stride!

You and I will be forever...
You will walk off on your own
Down the streets that you'll call home.

And I'll watch in wistful wonder
As you'll meet your destiny,
I'm there... Why don't you be free?
Take it over, take your time...

Oh, I was just a little girl
Gone deep into the world,
Thought I could take it on.

And you showed up right by my side,
My witness and my light
Now, we've grown up in stride!

Well, this world is forcing you to ride
Ups and downs I know you will survive
But if you need me
Well, I got you!

And they'll try to cut you down to size;
Broken hearts, they heal - they just take time
But if you need me
Well, I got you!

You...
You...
I've got you!

Oh, I was just a little girl
Gone deep into the world,
Thought I could take it on.

And you showed up right by my side,
My witness and my light
Now, we've grown up in stride...
