

# Katerine, Live Wire

I'm gonna find myself a call box  
I'm gonna spin myself around  
I'm a super power manga  
Gonna come out feeling stronger  
I'll kick it all over town  
I'm gonna get myself a mission  
Cause the people wanna get on down  
Stick your finger in the socket  
And I'll turbo charge your rocket  
Gonna spread myself around  
Full color intensify your dreams  
Turn up the power  
Feed from my electricity  
I wanna shoot you with my laser  
I'll get you sparked up from the ground  
I'm gonna turn into bionic  
Cause I know that you are on it  
Yeah the supersonic sound  
We don't need resuscitating  
Pulse is getting high  
Get the doctor operating  
It feels intoxicating  
You'll be shocked by my live wire  
Full color intensify your dreams  
Turn up the power  
Feed from my electricity  
Charge it up, burn it up, spark it up now  
Full color intensify your dreams  
Crank up the power  
Feed from my electricity  
Waking up to your own senses  
Cause you know you wanna tear away  
Just look what we've created  
So your life was overrated  
Push the button if you wanna play
