

Keith Caputo, The Girl I Love

Sister-step love I torn equal Filter and refine my black holes
What a day to spend the day within
To all the heartjack aborted people

When cunnilingus keeps your mouth full
Take this b-side song and throw it out the door
The girl I love don't love me anymore

The girl I love don't love me anymore
Take this b-side song and throw it out the door
The girl I love don't love me anymore
Accident inside your car crash

I'm out of place today, I can't stand
I'm unaware and tangled, I'm out to lunch
I'm doubled, face the show pushover

Hornet's nest is a fixed compulsion
The girl I love don't love me anymore
The girl I love don't love me anymore

The girl I love don't love me anymore
Take this b-side song and throw it out the door
The girl I love don't love me anymore
The industry has sucked my soul dry

I'm crying out my eyes, I can't cry
What a way to spend the day within
The girl I love don't love me anymore

The girl I love don't love me anymore
Take this b-side song and throw it out the door
