

Keith Whitley, Wherever You Are Tonight

I play the hits on the late night show
I'm the King of small town radio
When all the stars sing you to sleep
It's just this old turn table and me

She used to call about 2 a.m.
Feeling lonely and needing a friend
We would talk while I played her request
She always liked the love songs best

Chorus:
I still dream about her and me
And imagine how good it could be
This song goes out to you
Wherever you are tonight

She brought love to this lonely place
Though I never even saw her face
Now everytime I play those songs
I wonder if she's singin' along

I spin a record and stare at the wall
And realize how much I miss her call
I get caught up in the words they sing
Whishing that ol' phone would ring

Chorus:
I still dream about her and me
And imagine how good it could be
This song goes out to you
Wherever you are tonight

This song goes out to you
Wherever you are tonight
