

Kelli Ali, Here Comes The Summer

Here comes the summer

I've been waiting for you

Like two butterflies in glass jars

Staring out at sunny skies

Winter always comes when we part

See the sunset in my eyes...

Here comes the summer

Here comes the summer

I've been waiting for you

Seems a thousand years since we kissed

And you played me your guitar

It's so beautiful how life is

Once again now here we are...

Here comes the summer

Here comes the summer

I've been waiting for you

Here comes the summer

Here comes the summer

Like a dream coming true

When you left me could you see my tears in the rain?

I promised you this

I'd give for your kiss

The rising sun

Here comes the summer

Here comes the summer

I've been waiting for you

Here comes the summer

Here comes the summer

Like a dream coming true

Here comes the summer

Here comes the summer

Here comes the summer

I've been waiting for you

Here comes the summer

Here comes the summer

Here comes the summer

Like a dream coming true...
