

Kelly Family, New Morals (Human Race)

Some of our doctors I think are acting odd
Cause cloning humans I do believe is playing God
I can't believe what's happening with the animals
What good is mass production if now we have mad cow disease
Please no more, please stop all these wars

The Human race is committing suicide
Everyone of us is playing a little part
There's a real bad disease spreading worldwide
If it doesn't affect you physically
It will creep into your heart, creep into your heart

How can a state execute a person
In the name of justice but justice isn't done with murder
Modern society isn't based on family
Without foundation we turn into a hopeless generation
Please no more, please stop all these wars

The Human race is committing suicide
Everyone of us is playing a little part
There's a real bad disease spreading worldwide
If it doesn't affect you physically
It will creep into your heart, creep into your heart

Wouldn't it be nice if we would be like children
Playing soccer all day and building crazy treehouses
Please no more, I'm begging you to stop all these wars

The Human race is committing suicide
Everyone of us is playing a little part
There's a real bad disease spreading worldwide
If it doesn't affect you physically
It will creep into your heart, creep into your heart

The new morals nowadays
Yeah they're pretty crazy
I hope they will change
Cause otherwise I'm out of here
