Kelly Family, New Morals (Human Race)

Some of our doctors I think are acting odd Cause cloning humans I do believe is playing God I can't believe what's happening with the animals What good is mass production if now we have mad cow disease Please no more, please stop all these wars

The Human race is comitting suicide Everyone of us is playing a little part There's a real bad disease spreading worldwide If it doesn't affect you physically It will creep into your heart, creep into your heart

How can a state execute a person In the name of justice but justice isn't done with murder Modern society isn't based on family Without foundation we turn into a hopeless generation Please no more, please stop all these wars

The Human race is comitting suicide Everyone of us is playing a little part There's a real bad disease spreading worldwide If it doesn't affect you physically It will creep into your heart, creep into your heart

Wouldn't it be nice if we would be like children Playing soccer all day and building crazy treehouses Please no more, I'm begging you to stop all these wars

The Human race is comitting suicide Everyone of us is playing a little part There's a real bad disease spreading worldwide If it doesn't affect you physically It will creep into your heart, creep into your heart

The new morals nowadays Yeah they're pretty crazy I hope they will change Cause otherwise I'm out of here
