

Kelly Gene, You Were Meant For Me

life was a song, you came along
I lie awake the whole night through
If I should dare, to think you care
this is why I said to you
you were meant for me,
and I was meant for you
nature freshen too and when she was done
you were all those good things, roll into one
you're like a plative melody, that never less will be
I'm content that the angel must have sent you
and they made you just for me.
you're like a plative melody, that never less will be
I'm content that the angel must have sent you
and they made you just for me
