

Kendall Payne, Rollercoaster

Life gets a little better life stays a little gray
Live it up, live it long you can always count on
Those unexpected moments when the pleasure just
Sweeps you away
We were made for something better
Something better than this inconsistency
So while you wait to respond to what's really going on
Under shame, under doubt what the whole thing's all about
Sing to me
It's like a rollercoaster a hundred miles fast
Spins you round in circles 'till you want to collapse
Makes you so excited you can't wait for your second chance
Love gets a little moldy especially when it's you I'm trying to love
And the road get's so long seems so hard to sing along
But I can't ever imagine any other I would rather be dreamin' of
We are riding on the shoulders
Of the ones who've come before and the ones who've passed away
Some are good some are bad some are all we've ever had
To compare to prepare us for everything we're facing today
It's like a rollercoaster a hundred miles fast
Spins you round in circles 'till you want to collapse
Makes you so excited you can't wait for your second chance
To rock a rollercoaster a hundred miles fast
Spins you round in circles 'till you want to collapse
Makes you so excited so excited yeah yeah
Some are good some are bad some are all we've ever had
Some are tired some are bored some still stuck on keeping score
Some are kind some are mean some are never to be seen
Some are tired some are weak some are lying through their teeth
Some can love some can hate
I can relate
It's like a rollercoaster a hundred miles fast
Spins you round in circles 'till you want to collapse
Makes you so excited you can't wait for your second chance
It's like a rollercoaster a hundred miles fast
Spins you round in circles 'till you want to collapse
Makes you so excited so excited yeah yeah
