

# Kenny Chesney, When She Calls Me Baby

She'll call me honey  
When she needs a helping hand  
She might say darlin'  
If she needs someone to understand  
She'll call me sugar  
If she's feelin' kinda sweet  
She'll say that I'm crazy  
Over my little jealousies

When she calls me baby  
I just reach for the light  
I'll hold her like a lady  
Thank God she's all mine  
With her arms around me  
I can leave the world behind  
When she calls me baby  
I know what's on her mind

When this life has brought  
me to my keees  
She's got a way of bringin'  
out the man in me

When she calls me baby  
I just reach for the light  
I'll hold her like a lady  
Thank God she's all mine  
With her arms around me  
I can leave the world behind  
When she calls me baby  
I know what's on her mind

Oh, when she calls me baby  
I know what's on her mind
