

Kenny Price, See Ruby Fall

You've seen the way she pushes me around
You've seen her built me up then tear me down
You've seen this much but haven't seen it all stick around and see Ruby fall
She knows her way to strip me of my pride
She stood and laughed while I sat there and cried
She'll soon find out just how it feels to crawl stick around and see Ruby fall
See Ruby fall helplessly she's found someone who treats her like she treated me
When she finds out that love is not a game she'll realize she's got herself to blame
She played with love and now she's lost it all
Don't look for me when you see Ruby fall I won't be there when you see Ruby fall
