

# Kenny Price, See Ruby Fall

You've seen the way she pushes me around  
You've seen her built me up then tear me down  
You've seen this much but haven't seen it all stick around and see Ruby fall  
She knows her way to strip me of my pride  
She stood and laughed while I sat there and cried  
She'll soon find out just how it feels to crawl stick around and see Ruby fall  
See Ruby fall helplessly she's found someone who treats her like she treated me  
When she finds out that love is not a game she'll realize she's got herself to blame  
She played with love and now she's lost it all  
Don't look for me when you see Ruby fall I won't be there when you see Ruby fall
