

Kid Down, We'll Make It Away

What a perfect life
That we try to create here
Nothing good comes by
But we still try to live here

You all know what happens next
It's all so predictable
Every single step
We recognize from before

Meaningless is the word
And we're all a part of it
You all live your stupid lives
We don't try to follow it.

I'm trying to forget what it is like
Yes I'm trying to forget what it is like
I'm trying to forget what it is like
I've tried to forget what it, what it was like

We'll make it
Away from here
We're sorry
That you ended up like you did
Our time here
Has now stopped for good
And we're satisfied

You tried to apologize
Apology's not accepted
You all live your stupid lives
We don't try to follow it.

You all know that happens next
It's all so predictable
Every single step
We recognize from before

We'll make it
Away from here
We're sorry
That you ended up like you did
Our time here
Has now stopped for good
And we're satisfied
