

Kierra Kiki Sheard, Invisible

A total eclipse has just begun
We've blocked out the sun
Can't believe this is what we've come too
So you think that you're a star
But the real star had some scars
On his hands and feet were the nails went through
God's had headline made this show
To introduce him is what I am here for
So with out further delay
It's time to take the stage
Then I move out the way
So that they only see you that's inside of me
Don't let me block the view that's not what I want to do
I've got to be seen through make they see you make me invisible
The crowd applause and now you're on
They start to play your song but did he even come along
Or did he get left behind the day that you decided that you would out shine his light
But he's headlining this show
To introduce him is what I am here for
So with out further delay
It's time to take the stage
Then I move out the way
So that they only see you that's inside of me
Don't let me block the view that's not what I want to do
I want to be seen through make they see you make me invisible
Make me invisible
Make me invisible
It's time to take the stage
Then I move out the way
So that they only see you that's inside of me
Don't let me block the view that's not what I want to do
I've got to be seen through make they see you make me invisible
Make me invisible
Make me invisible
Make me invisible
Make me invisible
