

# Kiesza, No Enemiesz

Don't stop me just give me more  
You're what I want for sure  
Don't stop I just want you more  
Babe you're my only cure  
Do something to make you mine  
You could take all my time  
Don't stop I feel so alive  
Baby you blow my mind

Why stop when there's so much more  
Baby just show me how to  
Look, I'll give you so much more  
Or do you have it lining  
You've never felt this before  
Baby I know you want it  
Everybody knows-body knows-body knows-body

If we could all fall in love together  
If we could all fall in love together  
If we could all fall in love together  
We'd have no enemies, we'd have no enemies  
If we could all fall in love together  
If we could all fall in love together  
If we could all fall in love together  
We'd have no enemies, we'd have no enemies

Lights up, let me take you down  
That's what I want right now  
Freestyling make me go wild  
Baby just turn me around  
All that I can save for you  
Show me what you can do  
Don't stop me I can't refuse  
Take me the whole way through

If we could all fall in love together  
If we could all fall in love together  
If we could all fall in love together  
We'd have no enemies, we'd have no enemies  
If we could all fall in love together  
If we could all fall in love together  
If we could all fall in love together  
We'd have no enemies, we'd have no enemies
