

Kill Hannah, Songs That Saved My Life

Turn up the radio
I need it more than ever now
(More than ever now)

It's the first snow of the year
And something's in the atmosphere
It's coming here

First little memories out there
Soon you'll forget but I just can't

I'll remember
I'll remember everything
All the times when no one ever came
To get me
All the nights when I was scared
And when it got too weird
It was the song that saved me

I'll remember
Remember everything
All the tracks that shaped and changed me
Inside a spinning car
And lying on your floor

We were living in a broken world
We turned it up and then we watched the city burn

I'll remember
I'll remember everything
All the times when no one ever came
To get me
All the nights when I was scared
And when it got too weird

I cannot get free
I can't forget me
I won't forget

First little memories out there
Soon you'll forget but I just can't

I'll remember
I'll remember everything
All the times when no one ever came
To get me
All the nights when I was scared
And when it got too weird
It was the song that saved my life

I'll remember
I'll remember everything
Song that saved my life

I'll remember
I'll remember everything
Song that saved my life

I'll remember
I'll remember everything
It was the song that saved me
