

Kill Hannah, Statues Without Eyes

Lost and winter's on the way
And the air is craving in
And the streets are crumbling
But you are with me
Under the downtown city lights
We become statues without eyes
Barely audible
We're froze in time
I have you where i want you
Oh and i need to look away
When the jets are overhead
And the storm is closing in
Yeah something is happening
Beneath the modern cold high rise
We become statues without eyes
Stand at attention
They all align
I have you where i want you
Then it all aligns
It all aligns
I have you where i want you
We are statues without eyes
We were statues without eyes
We are statues without eyes
