

# Kill Hannah, The Songs That Saved My Life

Turn up the radio  
I need it now more than ever  
It's the first snow of the year  
And something in the atmosphere is coming here  
Froze our memories again  
Soon you'll forget but I just can't  
I remember  
I remember everything  
All the times when no one ever came to get me  
All the nights when I was scared  
And when it got too weird  
It was the song that saved me  
I remember, remember everything  
All the tracks that shaped and changed me  
Inside of speeding cars  
And lying on your floor  
When we were living in a broken world  
We turned it up and then we watched the city burn  
I remember, remember everything  
All the times when no one ever came to get me  
All the nights when I was scared  
And when it got too weird  
And I can't forget  
And I can't forget  
And I won't forget  
Froze in our memories again  
Soon you'll forget but I just can't  
I remember, remember everything  
All the times when no one ever came to get me  
All the nights when I was scared  
And when it got too weird  
It was the songs that saved my life  
It was the songs that saved me
