

Kill Hannah, The Songs That Saved My Life

Turn up the radio
I need it now more than ever
It's the first snow of the year
And something in the atmosphere is coming here
Froze our memories again
Soon you'll forget but I just can't
I remember
I remember everything
All the times when no one ever came to get me
All the nights when I was scared
And when it got too weird
It was the song that saved me
I remember, remember everything
All the tracks that shaped and changed me
Inside of speeding cars
And lying on your floor
When we were living in a broken world
We turned it up and then we watched the city burn
I remember, remember everything
All the times when no one ever came to get me
All the nights when I was scared
And when it got too weird
And I can't forget
And I can't forget
And I won't forget
Froze in our memories again
Soon you'll forget but I just can't
I remember, remember everything
All the times when no one ever came to get me
All the nights when I was scared
And when it got too weird
It was the songs that saved my life
It was the songs that saved me
