Killing Heidi, Summer Long

I am just a dreamer, you are just my dream Taking me to places, the likes I've never seen I am looking out of the window of a plane All the clouds are couches calling out your name There can't be an answer, no-one is to blame

All summer long, all summer long, summer long

I am like a record, spinning round again You are like the listener waiting to press play Take another chance on writing out your name Choose another colour, chalk it up again There can't be an answer, no-one is to blame

All summer long, all summer long, summer long All summer long, summer long

I just a dreamer, you are just my dream Spinning out to places, the likes I've never seen I am looking out of the window of a plane All the clouds are couches calling out your name There can't be an answer, no-one is to blame

All summer long, all summer long, summer long Summer long All summer long, all summer long, summer long Summer long, all summer long, summer long Summer long All summer long, all summer long, summer long Summer long All summer long
