

# Killing Heidi, Your Hands

Sunlight magnifies the pieces of her broken life  
She says everything is fine, in her head, in her head  
She's anaesthetised

Now she'll go high and low  
Look for a place to go  
And maybe she'll say to me that she knows  
This is apparition, just an echo  
Something that's gone and you've got to let go  
This is just a nightmare  
You can keep there a secret that you don't want me to share

Don't you over analyse  
Don't be so \*\*\*\*ing hypnotised  
I'm well, everything is fine, let go of my hand, of my hand  
I'm anaesthetised

Now she'll go high and low  
Look for a place to go  
And maybe she'll say to me that she knows  
This is apparition, just an echo  
Something that's gone and you've got to let go  
This is just a nightmare  
You can keep there a secret that you don't want me to share

Apparition, just an echo  
Something that's gone and you've got to let go  
That is a nightmare  
Can keep there  
Thought that you could take it but you can't anymore

Oh you know you gotta be the best  
Before they put you to the test  
And they tell you you're just like all the rest  
So don't bother, no time to get upset  
Just make a beeline for the queue where they administer to you  
A special number for your face, a ticket to a higher place  
Shadows aren't the only ones who ever feel alone  
When you take a dress up box and turn it into your home  
In the feathers and the dust the crowd pleasers are a must  
But you never ever stop, don't you let your guard drop  
They'll be waiting in the wings with all the shiny and pretty things  
And they tell you what you want to hear  
Everything in everything  
Ooh-ooh woah, ooh-ooh woah, ooh-ooh woahhh

This is apparition, just an echo  
Something that's gone and you've got to let go  
This is just a nightmare  
You can keep there a secret that you don't want me to share

Apparition, just an echo  
Something that's gone and you've got to let go  
This is a nightmare  
Can keep there  
I thought that you could take it but you can't anymore
