

Killwhitneydead, Liars Like You Live The Shortest

Stand up and face your enemy
You cowards face your enemy
Please don't even open your mouth
I already know what's going to come out
You made a mistake I won't let you make again
This ends right now
Liars like you live the shortest lives
I came for the showdown
Brought hell on my heels
I came for a war tonight
Crush you under my wheels
Eat my fucking dust
