

# Kim Petras, Something About U

Something about you, you, you  
Something about you, you, you  
Something about you, you, you  
Something about you, you, you

Something about you, you, you, you, that makes me go  
Takes me to the moon, moon, moon, moon, celestial  
Got me in a mood every time  
All I wanna do is what you like

High out of this world  
Galaxy stars in your eye-eyes yeah  
Your orbit, take me to an another whole planet, ah

Feels like I'm never high enough  
Come pull me closer beam me up

Something about you, you, you  
Something about you, you, you  
Something about you, you, you  
Something about you, you, you

Mercury mercury rising  
I dont give a fuck what your sign is  
I already know we aligning  
You already know what the time is

Love it when we in the bed  
Rock it when you give me head  
Psychedelics to my head  
Back in outer space again

Feels like I'm never high enough  
Come pull me closer beam me up

Something about you, you, you  
Something about you, you, you  
Something about you, you, you  
Something about you, you, you
