## Kings Of Leon, Revelry

What a night for a dance, you know I'm a dancing machine With the fire in my bones and the sweet taste of kerosene I get lost in the light so high don't wanna come down To face the loss of the good thing that I have found

Woo hoo hoo Woo hoo hoo

In the dark of the night I can hear you calling my name With the hardest of hearts I still feel full of pain So I drink and I smoke and I ask you if you're ever around Even though it was me who drove us right in the ground

See the time we shared it was precious to me But all the while I was dreaming of revelry

Gonna run baby run like a stream down a mountainside With the wind at my back I won't ever even bat an eye Just know it was you all along who had a hold of my heart But the demon in me was the best of friends from the start

So the time we shared it was precious to me All the while I was dreaming of revelry Dreaming of revelry

And I told myself for the way you go, it rained so hard it felt like snow Everything came tumbling down on me In the back of the woods in the dark of the night Palest of the pale, old moonlight Everything just felt so incomplete

Dreaming of revelry Dreaming of revelry Dreaming of revelry Dreaming of revelry
