

# Kinky Machine, Counting Down to Zero

Sitting around waiting for the sky to fall down  
The day is gonna come  
There's no need to worry  
The years go by they're getting quicker every time  
There must be something wrong  
Too late to be sorry

Under the sleeping volcano  
There's a bomb waiting to explode  
Counting down to zero  
We are  
Counting down to zero

Alone you sleep 'cept for the memories you keep  
You took a coma dose  
You're not gonna come round  
Caught in a rut so many ties you never cut  
You could be tripping but you're waiting for the come down

So keep on treading the same spot  
Left in the land that time forgot  
Counting down to zero  
We are  
Counting down to zero  
We are  
Counting down to zero

Is this just fate or somebody else's mistake  
I never listened when you told me it was coming  
Would you believe you're in a world that you can't leave  
The moment's standing still  
And the engine's running

Under the sleeping volcano  
There's a bomb waiting to explode  
Counting down to zero  
We are  
Counting down to zero  
We are  
Counting down to zero...
