

Kip Winger, Everything You Need

A life spent searchin' for bridges
that cross through the pain of hollow places
When heart call you from out of the night

Now that loves found you, it surrounds you
It's everything you need
There's nothing you can't do, it's always in you

As long as you believe

A life spent dry-eyed, wondering who let you down
until you can just let it go
When heart comes to help you shine your own light

Now that loves found you, it surrounds you
It's everything you need
There's nothing you can't do, it's always in you As long as you believe

Life can turn you, even burn you,
if you look the other way
If the grass is greener read between
where the meaning got away

Now that loves found you, it surrounds you
It's everthing you need
There's nothing you can't do, it's always in you
As long as you believe
