Kip Winger, Here

Here... in here You belong Here... it's clear You belong

I wish a falling star could cause The world to disappear All I want is to Be all alone with you Here...

I need you near Come along

We'll dream the day together A virgin atmosphere All I want is to Be all alone with you

Look at us here... All alone in here...

We'll dream the day together The words will disappear You make it all so new I'm so in love with you

You belong here... All alone in here... You belong... Here
