

Kip Winger, Only One Word

Where will you go?
What will you see?
If I have to find you
Where would you be?
Did you decide this
from all the way down here?

A river of Novocain
could never ease the pain
that I'll never see you again

And I'm still so freaked
that we couldn't even speak
If only one, only one word
But no words were spoken
your body lay broken
If only one word

You taught me love
Saw it so clear
I took for granted
you'd always be near
I'd watch you light up
from all the way down here

I fell so dumb now
That I couldn't somehow
lift you up out of this
But the magic in me
so full of disease
It's one black kiss

A river of Novocain
could never ease the pain
That I'll never see you again

And I'm still so freaked
that we couldn't speak
If only one, only one word

So much to forgive
There's so much to forgive
