

Kisschasy, Overdose

I see you in the mirror
You're outshining everyone
So cold it makes me numb

I almost died again
I tied a rope around my neck
So don't you ever let go

Don't give up now, breathe in and out
Do you, feel it at all
We played the show, one song to go
That's too long

And it's like swallowing glass
It turns me inside out
I don't recognise myself at all
And I'll overdose on anything you've got
Coz I don't want to die alone
I'm taking you down

Don't give up now, breathe in and out
Do you, feel it at all
We played the show, one song to go
That's too long

Don't give up now, breathe in and out
Do you, feel it at all
We played the show, one song to go
That's too long
